

Direct worker reporting

Anonymous insight direct from workers about working lives and wellbeing

Because with or without a crisis, you need good data, presented simply, to track improvement & clarify urgencies

Monitoring rapid change is different to supplier assessment.

- Tracking needs, & measuring impact on recovering supply chains.
- Suppliers benefit as much as buyers from better data.

What our system offers...

**Remote
monitoring** of
working conditions
and worker
wellbeing

Monitoring of the
**impact of
COVID-19 on
suppliers and
workers** along
global supply chains

**Monitoring
small
suppliers
and labour
providers**

Monitoring of
**impact of COVID-19
on stay-at-home
workers**

ENGAGE - how it works

5 minute call, in
the language of
the worker's
choosing

Anonymous -
workers press 1, 2
or 3 on their
phones,
responses
cannot be traced

20 questions:
always simple,
single, literal
questions

The data lands on
simple
dashboards, that
use a traffic light
rating system

Map Satellite

i What to look for

The Suppliers Map shows all participating sites, and the overall score of each site when you click on it. Each site score is a score out of 10. This is calculated using all the overall ratings from all completed calls. This site score treats every question as equally weighted. Use this map to compare across your suppliers and supply sites - which are doing especially well, and which need support.

Dashboards are uncluttered and simple

3.3 IndoCocoa

What to look for

The higher the reds, the more urgent the issue, according to the workers who participated. Red = poor and needs improvement, green = good, amber = don't know. Use this chart to see which changes the workers would like prioritised.

Priorities

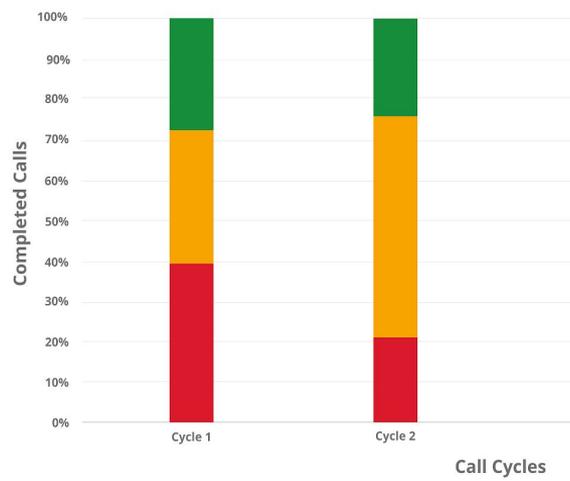

Then dive into the detail - one click away...

The **Priorities Chart** - priority issues according to workers themselves.

4.9 Kiambu Coffee

i What to look for

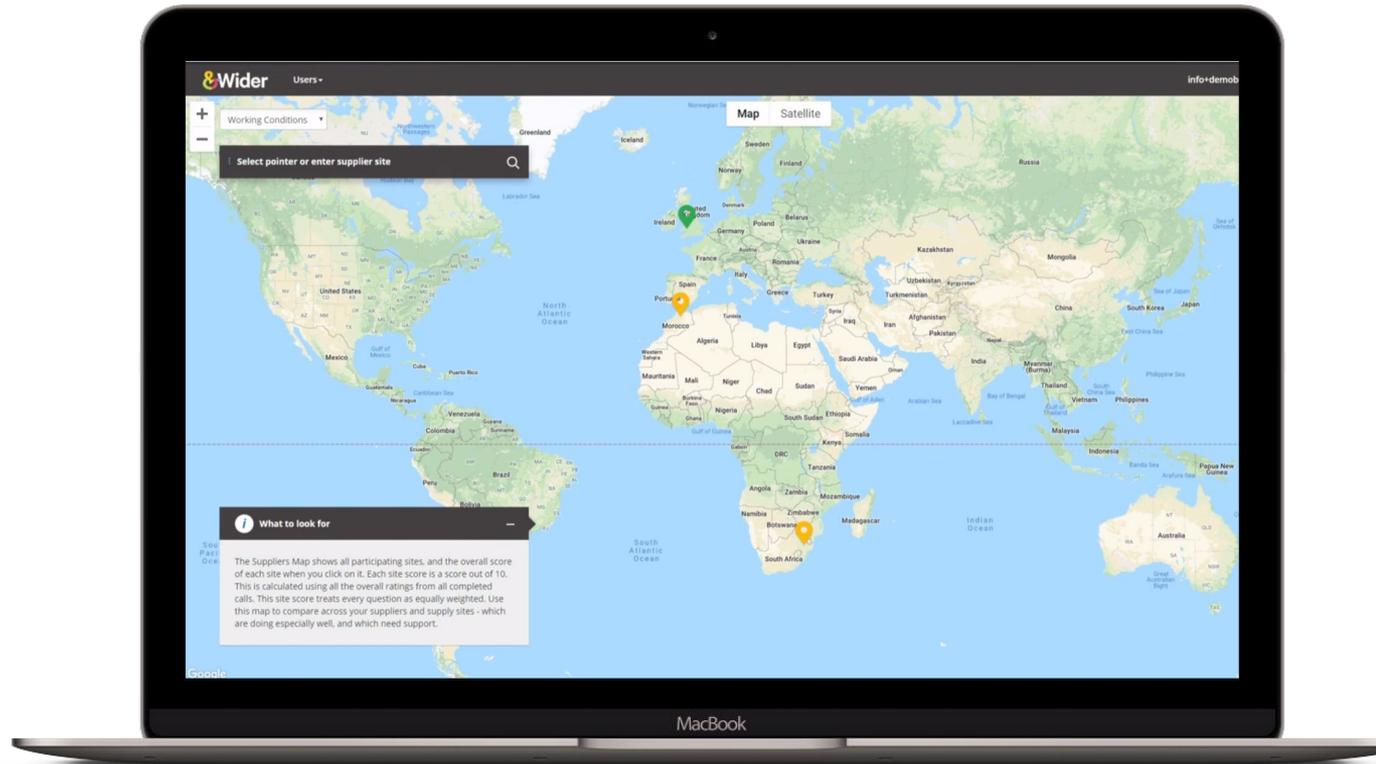

This is where you get to see where there has been progress from one call cycle (series of calls to your supplier's workers) to another. The companies we work with aim to have more greens and less reds in their quarterly bar for this cycle than they showed for the previous cycle. This is what we all refer to as continuous improvement.

How to measure impact of new measures or corrective actions?

- Use our “Compare with previous results” function.
- And the Progress Chart measures improvement over time.

ENGAGE:
Getting a site
ready to roll

System is fully built
and running. Just
push play

Ten working days to
launch calls to
workers on any site,
anywhere

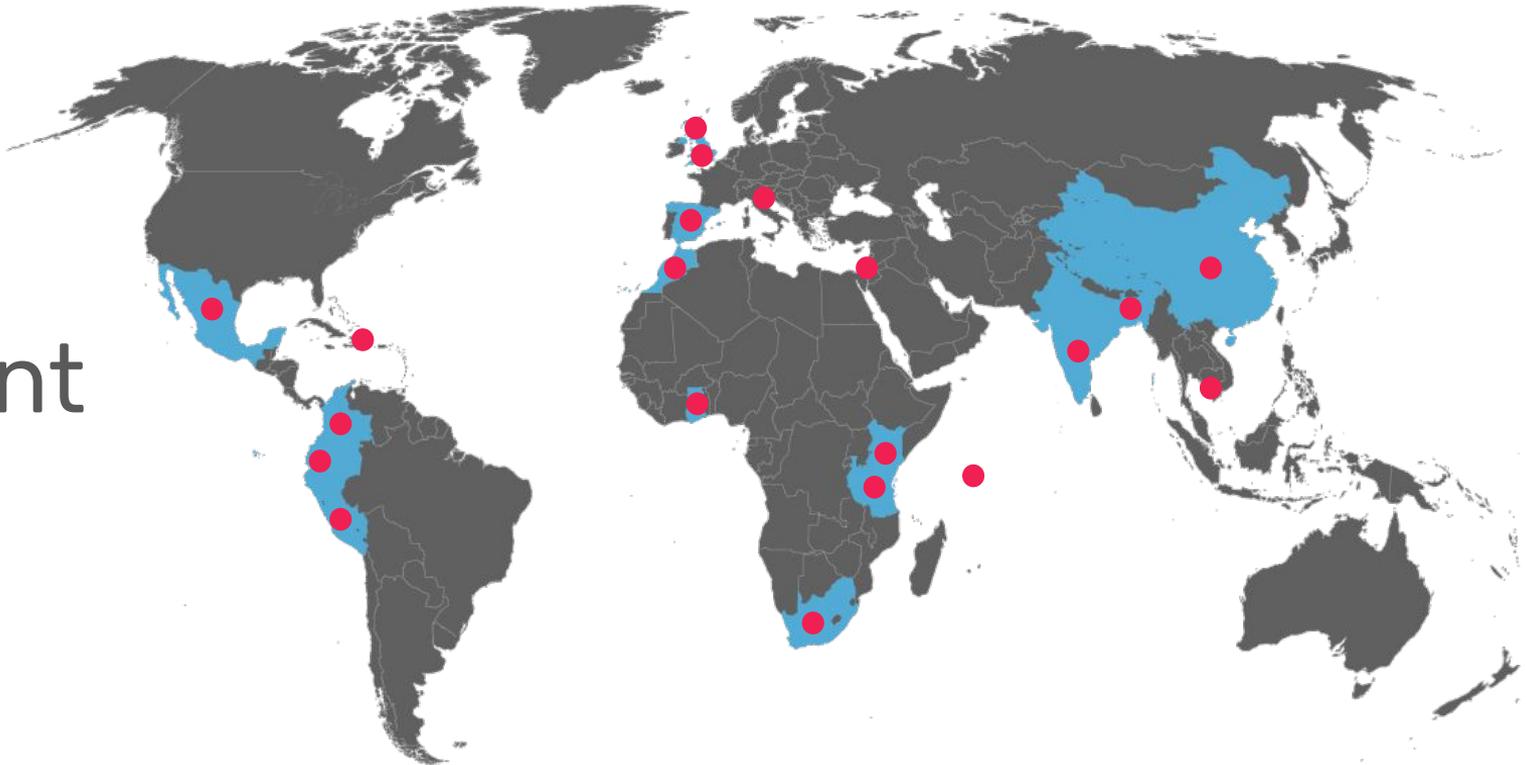

One hour of
supplier's time

Results you can trust

- Not all about the tech, it's about knowing how to adapt it to gather sensitive data you can trust
- How? **Engaging the supplier**
- Unlocking **worker trust**
- **Survey design** expertise
- Keeping it **simple, with support** on tap

Our global footprint

What we need to get started

Supplier needs to register and upload **workers' mobile numbers**. Our support team can help with practical suggestions to make this easy.

Mobile phone signal active on the site, and for workers to be allowed to answer calls during breaks.

A man in a red and black jacket and harness is holding a green apple in an orchard. He is looking down at the apple. In the background, another person is visible, and there are crates of apples.

Remote monitoring -
because resilient
businesses require good
data.
